

FY2006 Nuclear Physics Workforce Survey

Office of Nuclear Physics

This report conveys the results of the October 2006 survey of scientific workforce in the Department of Energy, Nuclear Physics (NP) program. The same procedure as in previous years was used. People were counted in the categories of permanent Ph.D. staff, temporary Ph.D. staff, Ph.D. staff not supported by DOE, DOE-supported graduate students, and graduate students not supported by DOE. Counts of Ph.D.'s awarded were also collected. In all cases, people were asked to self-define whether they were primarily doing experimental or theoretical work. Persons who receive support from the National Science Foundation are not included in this survey.

On October 1, 2006, we found that 2,106 supported and non-supported scientists and students were associated with the program. Of this number DOE supported 699 permanent Ph.D. staff, 344 temporary Ph.D. staff, and 486 graduate students. Not supported directly by DOE but associated with the program were an additional 228 Ph.D. staff and 349 graduate students. DOE also supported 92 graduate students who were awarded PhDs.

Summaries of the numerical data for the years 1986 through 2006 are provided as well as separate summary data for the national laboratories and universities, and statistics on the Ph.D.'s awarded.
